SUMMARY

Software Engineer with 2.5+ years of experience in Angular, ASP.NET Core and Flutter. At Dial ERP Technology I build enterprise CRM & ERP products: REST APIs in ASP.NET Core, Angular (Material) front-ends, WhatsApp automation with Meta's Cloud API, and AI features with Azure OpenAI and Azure AI Search.

Total experience: 2.5+ years

EXPERIENCE

Software Engineer · Dial ERP Technology Ltd. Nov 2024 – Present · Gurgaon, Haryana

- Build and maintain enterprise CRM & ERP modules with Angular, ASP.NET Core Web API (C#) and MongoDB.
- Designed and shipped 40+ REST APIs and a library of reusable Angular Material components.
- Integrated Meta WhatsApp Cloud API end-to-end — template messages, media, webhooks and bulk messaging.
- Implemented AI chatbot features with Azure OpenAI and Azure AI Search (retrieval-augmented generation).
- Own production support — debugging, bug fixes and performance optimization.
- Work in Agile sprints with code reviews and Git-based workflows.

Flutter & Angular Developer · Hunarship Until Oct 2024 · Jodhpur, Rajasthan

- Built the EduCareer admin panel in Flutter Web on Firebase — students, job seekers, job providers, a student-query workflow, dashboards and PDF export.
- Developed Flutter mobile apps with Firebase and Laravel back-end integration; integrated REST APIs.
- Designed responsive mobile user interfaces.

SKILLS

Core: Angular, TypeScript, ASP.NET Core Web API, C#, MongoDB, Azure OpenAI, Azure AI Search, WhatsApp Cloud API

Also: Angular Material, REST APIs & Webhooks, Flutter, Dart, Firebase, Laravel, MySQL, PostgreSQL, Redis, SQL, JavaScript, HTML5, CSS3, Bootstrap, Google Maps API, Linux & shell

Familiar: Python, Java, C/C++

Tools & practices: Git & GitHub, VS Code, Visual Studio, Postman, Android Studio, Agile / Scrum, Code reviews, AI-assisted development (Claude)

SELECTED PROJECTS

WhatsApp CRM & AI Automation Platform — Enterprise CRM/ERP modules with end-to-end WhatsApp Cloud API messaging and an AI chatbot on Azure OpenAI + Azure AI Search.

Setu — WhatsApp Bulk Messaging — WhatsApp bulk message sender — reach your whole customer list with one campaign instead of messaging people one by one.

2026.co.in — QR Ordering & Café Management — QR scan-and-order platform for cafés and restaurants — table and room QR codes, menus and orders, with multi-café subscriptions and billing.

Geo Tracker — Field-sales tracking on Google Maps — managers replay each sales employee's route by date, with an animated marker, speed controls and a timeline.

EDUCATION

Master of Computer Applications (MCA) — MBM University, Jodhpur, Rajasthan 2024 · 84%

Bachelor of Computer Applications (BCA) — Lucky Institute of Professional Studies, Jodhpur, Rajasthan 75%

ACHIEVEMENTS

- Developed an AI-powered CRM and WhatsApp automation platform using Angular, ASP.NET Core Web API, C# and MongoDB.
- Implemented Azure OpenAI integration to enable AI-powered CRM features.
- Built the Geo Tracker application with Google Maps integration.
- Delivered multiple production-ready enterprise application modules.
- Developed and deployed multiple AI-assisted projects using Claude AI.
